

CAP THEM ALL!

Now available! LVL semi-automated hand-held decapper / capper. The best choice for medium through put sample storage workflows.

- Available in SBS 96, 48 and 24 formats for all models of LVL SAFE® 2D barcoded tubes
- Standardized, reproducible torque for a reliable and safe capping
- Rapid capping and decapping
- One motor per channel, therefore no tolerance fluctuations
- Pressing the button once starts capping/decapping
- Ejects caps safely

Spring loaded retention balls keep caps securely in place.
